Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Application No. Applicant(s) 10/606,304 DANIELS ET AL. Office Action Summary Examiner Art Unit MARY HOFFMAN 3733 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 05 May 2008. 2a) ☐ This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-3 and 5-29 is/are pending in the application. 4a) Of the above claim(s) 9-29 is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) 1-3 and 5-8 is/are rejected. 7) Claim(s) _____ is/are objected to. 8) Claim(s) _____ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10)⊠ The drawing(s) filed on <u>05 May 2008</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/05/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kashuba et al. (U.S. Patent No. 5,908,423).

Kashuba et al. disclose a reamer (see FIG. 2) for preparing a cavity in the intramedullary canal a long bone, the reamer comprising a first component (ref. #22) for preparation of the cavity in the canal, the first component including a portion thereof for placement at least partially in the cavity of the long bone, the first component defining a rotational centerline thereof; and a rigid second component (ref. #44) operably

Application/Control Number: 10/606,304

Art Unit: 3733

connected to the first component, the second component defining a rotational centerline thereof, the rotational centerline of the first component and the rotational centerline of the second component having a first relationship in which the centerlines are coincident and a second relationship in which the centerlines are skewed with respect to each other (see FIG. 4). The reamer further comprises a joint (ref. #29, #47, FIG. 2) operably connected to the first component and to the second component, the joint adapted to provide the first relationship in which the centerlines are coincident and the second relationship in which the centerlines are skewed with respect to each other. The first component includes a portion thereof having a tapered external periphery (see bottom of ref. #22); and wherein the second component includes a portion thereof having a drive connection (ref. #48a). The reamer further includes a securing feature to rigidly attach (col. 6, 66-end and col. 7, lines 1-3) the first component the second component in at least one of the first and second relationships; the securing feature comprises a pin (ref. #12). The securing feature can also be interpreted as ref. #38 and 40. The first component and the second component are hinged to each other. The first component and the second component define openings (ref. #24, #49) therein for receiving the pin.

Response to Arguments

Applicant's arguments filed 05/05/2008 have been fully considered but they are not persuasive.

In response to Applicant's argument that Kashuba et al. does not include certain features of Applicant's invention, the limitations on which the Applicant relies (i.e., the

Application/Control Number: 10/606,304 Page 4

Art Unit: 3733

reamers being "locked" together in a particular position) are not stated in the claims. Therefore, it is irrelevant whether the reference includes those features or not. The claims merely require that the securing feature be capable of rigidly attaching the first component to the second component in least the first relationship, second relationship, or both first and second relationship. In this case, the securing pin ref. #12 is capable of meeting this functional language. The pins ref. #38 and 40 are also capable of performing this function. So they also can be considered the securing feature of claim 1.

The rejection is deemed proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary Hoffman whose telephone number is 571-272-5566. The examiner can normally be reached on Monday-Friday 9:00-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo C. Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
